Professional Profile

Analytics Engineer with a Master of Science (M.Sc.) in Industrial Engineering, focused on designing data architectures and analytical modeling to support business decisions at scale. Expert in **SQL**, **Python**, and **BigQuery**, building robust **pipelines** and integrating sources such as **CRM**, **GA4**, and marketing platforms to define reliable and actionable metrics. I have incorporated **Artificial Intelligence** and **Machine Learning** into Marketing Operations to automate processes and improve operational efficiency. I specialize in turning complex data into scalable analytical models that generate business impact in **cloud environments (GCP, AWS, Azure)**.

Experience

Clio

- **Data Analyst Specialist - Marketing Operations** | April 2026 - PRESENT
 - Lead the integration of Artificial Intelligence and Machine Learning models to enhance company process efficiency and scalability.
 - Develop predictive models based on CRM data and web behavior to estimate prospect conversion probability.
 - Design and implement AI agents to automate high-volume repetitive tasks, including web scraping, entity matching, and data cleaning.
 - Optimize workflows through automation, enabling the team to focus on higher-value analytical tasks.
- **Data Analyst - Marketing Operations** | July 2025 - March 2026 (9 months)
 - Led the development of end-to-end data products, aligning business needs with data architecture to support strategic decisions.
 - Designed and optimized BigQuery pipelines integrating HubSpot, GA4, and Google Ads, improving immediate data availability.
 - Implemented data models and metrics in SQL, ensuring consistency and data governance.
 - Developed automated Looker Studio dashboards to track marketing KPIs, improving team visibility and decision-making.

Universidad de Los Andes

- **Graduate Teaching Assistant** | August 2023 - December 2024 (1 year 6 months)
 - Taught Machine Learning fundamentals in the Probability & Statistics II course using Python and R.
 - Explained supervised models (linear and logistic regression) and unsupervised models (clustering) applied to real-world problems.
 - Translated complex technical concepts into accessible explanations for students with varying levels of experience.
 - Supported the development of analytical skills in students, facilitating the comprehension of data science techniques.

SUpost

- **Data Engineer - Consultant** | August 2021 - October 2023 (2 years 3 months)
 - Implemented ETL processes that improved data availability and quality.
 - Developed data visualization solutions that contributed to customer acquisition and retention.
-

Education

Master of Science (M.Sc.) in Industrial Engineering - Focus on Data Analytics

Universidad de Los Andes | 2023 - 2024, Bogotá, Colombia

- **Relevant Coursework:** *Mastering machine learning, Computational analytics for decision making, Statistical learning for data analysis, Design of experiments in engineering, Advanced optimization.*

B.S. in Computer Systems Engineering

Universidad de Los Andes | 2017 - 2026 Bogotá, Colombia (in progress)

B.S. in Industrial Engineering

Universidad de Los Andes | 2014 - 2022 Bogotá, Colombia

Skills

Languages & Data Science: Python (Pandas, Numpy, Scikit-learn, PyTorch), R, SQL.

Cloud & Infrastructure: GCP (BigQuery), Azure, AWS.

Marketing & Analytics: HubSpot, Salesforce, GA4, Google Ads, Looker Studio, Power BI.

AI & Automation: AI Agents, Web Scraping.

Tools: Git/GitHub.

Publications

Causal survival analysis for estimating the risk of renal failure in diabetic patients based on the health entity provider of the contributory regime to which they are affiliated in Colombia.

Universidad de los Andes Repository. (2024) ([Publication Link](#))

Awards & Honors

Graduate Assistantship Scholarship for the Master of Science in Industrial Engineering with a focus on Data Analytics (2023-2024). Universidad de los Andes. (Bogotá, Colombia)

Certifications

Microsoft Certified: Azure Fundamentals (AZ-900), 2025

Languages

English: Professional Working Proficiency (B2 Level)

Spanish: Native

Hobbies

Dancing, chess, table tennis, gym
